# INDIA - Opportunities lie ahead

Doesn't it astonish that over 35 million students complete their graduation in India every year? Of that, around 1 million go abroad to complete their studies. Have a look at this huge gap in the number of students who complete their graduation and the number of students who enroll in foreign universities. While the number of students who go abroad for studies is increasing exponentially year-by-year, there is still a lot of scope to help the students attain the best foreign education.

## Expand

The students flow to popular educational destinations like the US, the UK, and Australia has seen good growth. The count of Indian students studying in America was 132,888 in the year 2014-15. That steadily rose up to 186,267 in 2016-17. The spending on tuition and hostel fees by Indian students on the foreign shores has shot up from \$2 billion in 2013-14 to \$3 billion in 2017-18. This clearly shows that the number of Indian students studying abroad has risen up sharply.

- Out of this, more than 55% of the students prefer to study in Canada and the USA.
- A total of 1 lakh students go to Asia and Australia to graduate from their institutions.
